The Biology department offers high-demand and core courses every semester, and upper division courses on a rotating basis. The Biology department cannot guarantee that each course will always be offered according to the schedule below, however, it will be followed as closely as possible.

BIOL 1103 & 1104, Introductory Biology 1 and 2 – Fall, Spring and Summer semesters.
BIOL 2106, Introduction to the Biological Sciences, - Fall and Spring semesters
BIOL 2107 & 2108, Principles of Biology 1 and 2 – Fall, Spring and Summer semesters
BIOL 2110 & 2120, Human Anatomy and Physiology 1 and 2 – Fall, Spring and Summer semesters
BIOL 2300, Microbiology and Public Health – Fall, Spring and Summer semesters
BIOL 2310, Fundamental Microbiology Laboratory – Fall, Spring and Summer semesters
BIOL 2800, Introduction to Molecular Biology – Fall and Spring semesters
BIOL 3020, Introduction to Marine Biology – Fall, Spring and Summer semesters
BIOL 3021, Infectious Diseases and Society – Fall and Summer semesters
BIOL 3240, Human Physiology – Fall, Spring and Summer semesters
BIOL 3250, Human Physiology Laboratory – Fall and Spring semesters
BIOL 3420, Biotechnology – Fall and Spring semesters
BIOL 3440, Fundamentals of Evolution – Fall and Spring semesters
BIOL 3800, Molecular Cell Biology – Fall, Spring and Summer semesters
BIOL 3810, Molecular Cell Biology Laboratory – Fall, Spring and Summer semesters
BIOL 3820, Plant Biology – Fall and Spring semesters
BIOL 3840, Animal Biology – Fall, Spring and Summer semesters
BIOL 3850, Animal Biology Laboratory – Fall, Spring and Summer semesters
BIOL 3880, Microbiology – Fall, Spring and Summer semesters
BIOL 3890, Microbiology Laboratory – Fall, Spring and Summer semesters
BIOL 3900, Genetics – Fall, Spring and Summer semesters
BIOL 3910, Genetics Laboratory – Fall, Spring and Summer semesters

At least four 4000-level courses that will satisfy the Neurobiology and Behavior Concentration – Fall and Spring semesters
At least four 4000-level courses that will satisfy the Microbiology Concentration – Fall and Spring semesters

At least six 4000-level courses that will satisfy the Molecular Genetics and Biochemistry Concentration – Fall and Spring semesters

At least seven 4000-level courses that will satisfy the Pre-Professional/Physiology Concentration – Fall and Spring semesters.
